Cat Programs Gap Analysis

Step 1: Identify your community. Is it the city you live in? The county? A group of counties?

Step 2: Identify the municipal shelter(s) in your community.

Step 3: Determine, to the best of your ability, the municipal shelter(s)'s intake for each of the below populations of animals.

	# Entering Municipal Shelter(s)	# Killed at Municipal Shelter(s)	% Live Outcome
Cats:			
Healthy Adult Cats			
Nursing cats + kittens			
Healthy, weaned kittens (6 weeks +)			
Unweaned, orphan kittens (0-6 weeks)			
Ringworm			
FeLV+			
FIV+			
Unsocialized cats/community cats			
Cats with Behavior Problems			
Cats with significant medical needs			
Panleuk			
Other:			

Step 4: Which populations have the highest need? Which populations have need and would also be relatively easy to help?

Step 5: Decide which populations you will target first, create a plan, and start saving them!
