
The FeLV Sanctuary

Cats with the Feline Leukemia virus can live long, happy lives. Despite this fact, at too many animal shelter, cats with FeLV are routinely euthanized.

At Austin Pets Alive!, we believe these cats also deserve to live, to be adopted, and to be loved. The Sanctuary is their special place while waiting for adoption.

Visit our adoptable 'Felvies' daily from 11:30-7. FeLV cats have no adoption fee and APA! provides complimentary medical care for conditions related to the virus.

Help us save these wonderful, adoptable cats. Adopt. Donate. Volunteer today!
